Hybrid

- Architected the company website from scratch using Next.js 15 and TypeScript, developing **50+ accessible components** and engineering a **45% reduction in initial bundle size**.
- Developed an **interactive choropleth map** with React Simple Maps and GeoJSON to **visualize company impact** via district-level enrollment and program data.
- Automated Vercel deployments via **CI/CD**, achieving a **98/100 SEO score** and **LCP < 1.2s**.

Projects

Synapse-Docs | FastAPI, React, Google Gemini, Faiss, Docker, GCP

Team Project

Adobe India Hackathon 2025 | Runner-up in the Grand Finale

[GitHub](#)

- Led a **3-member team** to develop a full-stack document intelligence platform that transforms static PDF libraries into an interactive, queryable knowledge base, enabling users to **instantly discover cross-document connections**.
- Prioritized user research efficiency by engineering a **sub-500ms semantic search** using FastAPI and Faiss, reducing the time to find critical information across multiple documents from minutes to seconds.
- Introduced a **visual knowledge graph** and a **navigable research trail** to simplify discovery and prevent user disorientation in complex document libraries.

Haskell Run | TypeScript, Node.js, VS Code API

Individual Project

VS Code Extension

[GitHub](#)

- Developed a **lightweight extension** using TypeScript and the VS Code API to enable **one-click execution** of Haskell scripts and functions, streamlining the developer workflow.
- Enhanced the development environment by integrating a suite of tools including an **interactive REPL**, debugging capabilities, and intelligent code snippets.
- Achieved **1250+ active users**, actively gathering feedback for further improvements.

AttendEase | HTML, CSS, JS

Individual Project

Browser Extension

[GitHub](#)

- Enhanced the student portal experience by creating a tool that automates attendance calculations, translating raw data into a simple UI with actionable insights for over **400+ students**.
